

RENEWABLE ENERGIES CHAIR

RESEARCH SCHOLARSHIP FOR BACHELOR'S DEGREE – 4 VACANCIES

22 of September of 2024

A call for tenders is open for 4 Scholarships for Bachelor's Degree within the scope of the project NEXUS Innovation Pact - Green and Digital Transition for Transport, Logistics and Mobility, Ref. C645112083-00000059, funded by the Portuguese Recovery and Resilience Plan program, through the European Union – NextGenerationEU (2022-C05i0101-02), under the following conditions:

Scientific area: Engineering sciences and technologies

Admission requirements:

Scholarship 1	<ul style="list-style-type: none"> • Bachelor's degree in Electrotechnical Engineering, or equivalent to the scientific area indicated. This is a compulsory condition. • Preferably enrolled in a Master's degree in Solar Energy. • Familiar with photovoltaic solar energy systems and electrochemical energy storage systems, with knowledge of different technologies and their applications. Experience in the design, dimensioning and planning of solar photovoltaic systems. • Preferably with knowledge of the integration and impact of solar power plants in aquatic contexts and floating photovoltaic systems. • Good command of English and Portuguese, these will be the working languages. • Good command of programming languages and experience in using simulation software for photovoltaic solar energy (PVSyst, PVGIS, RETScreen, HOMER).
Scholarship 2	<ul style="list-style-type: none"> • Bachelor's degree in Renewable Energy Engineering, or equivalent in the indicated scientific area. This is a mandatory requirement. • Preferably enrolled in a Master's program in the indicated scientific areas. • Familiarity with photovoltaic solar energy systems, with knowledge of different technologies and their applications. Knowledge at the level of photovoltaic applications in buildings or human infrastructures. • Preferably knowledgeable about the integration of photovoltaic systems within the Portuguese legal context. • Good command of English and Portuguese, as these will be the working languages. • Proficiency in programming languages and experience with simulation

	software for photovoltaic solar energy (e.g., PVSyst, PVGIS, etc.).
Scholarship 3	<ul style="list-style-type: none"> • Bachelour degree in Renewable Energies Engineering, or equivalent to the scientific area indicated. This is a compulsory condition. • Preferably enrolled in a Master's degree in the referred scientific areas. • Familiar with photovoltaic solar energy systems, with knowledge of different technologies and their applications. Knowledge of recycling processes and reuse of materials. • Preferably with knowledge of simulation and modelling of solar photovoltaic systems. • Good command of English and Portuguese, these will be the working languages. • Good command of programming languages and experience in using simulation software for photovoltaic solar energy (e.g. PVSyst, PVGIS, etc.).
Scholarship 4	<ul style="list-style-type: none"> • Bachelor's degree in Renewable Energy Engineering, Electrical Engineering, Transport Engineering, Mechanical Engineering, Environmental Engineering, Computer Science, or related areas. This is a mandatory requirement. • Preferably enrolled in a Master's program in the indicated scientific areas. • Familiarity with photovoltaic solar energy systems, knowledge of electric mobility, and electric vehicle technologies. • Familiarity with energy management systems and electric vehicle charging infrastructure. • Knowledge of system modeling and simulation, preferably in port environments. • Preferably knowledgeable about the integration of electric mobility systems within the Portuguese legal context. • Good command of English and Portuguese, as these will be the working languages. • Proficiency in programming languages and experience with simulation software (e.g., MATLAB, etc.).

As set forth FCT Research Scholarship Regulation No. 950/2019 of December 16, 2019, article 3 and 6, candidates for “BI” (Research Grants) must comply as a rule condition for the award of the scholarship, the effective inclusion in study cycles leading to the attribution of academic degrees or in courses not leading to an academic degree. Courses that do not confer an academic degree correspond to the courses provided for in subparagraph e) of paragraph 3 of article 4 of Decree-Law No. 74/2006 of 24 March and must be developed in a higher education institution in association with at least one R&D unit, including a course plan in one or several research areas of the unit.

Work plan:

Scholarship 1	<p>The work plan envisaged for the scholarship is related to the activities of the NEXUS project in the area of the development of floating photovoltaic systems and/or mitigation of land use for solar photovoltaic plants:</p> <ul style="list-style-type: none"> • Analysing the legal framework for floating photovoltaic applications. • Definition of technical specifications and testing methodology in experimental floating photovoltaic pilots. • Support in the design, implementation, commissioning and testing of pilot structures in these areas. • Technical support in the R&D tasks included in the project. • Support in analysing the technical-scientific results of these pilots, calculating indicators and results metrics. • Support in the development of optimisation of the characteristics of this technology, with a view to enabling its integration into the Portuguese market. • Analysing and producing technical documentation relating to this area, to be developed as part of the project. Support in producing project reports and publishing scientific results. • Support for the project's dissemination and knowledge transfer activities. • Support for ongoing R&D tasks at the Renewable Energies Chair.
Scholarship 2	<p>The planned work for the scholarship is related to the activities of the NEXUS project in the field of developing infrastructures integrated with photovoltaics:</p> <ul style="list-style-type: none"> • Analysis of the legal framework for photovoltaic applications integrated into infrastructures. • Definition of typical technical specifications and testing methodology for photovoltaic applications in infrastructure elements such as noise barriers or collision barriers on roads and highways, road pavements, dikes, water channels, landfills, viaducts, road covers, and parking lots. • Support in the design, implementation, commissioning, and testing of pilot structures for various use case trials. • Technical support for R&D tasks included in the project. • Support in the analysis of the technical-scientific results of these pilot projects, calculating key performance indicators and result metrics. • Support in developing the optimization of this technology's characteristics, aiming to enable its integration into the Portuguese market. • Analysis and production of technical documentation related to this area, to be developed within the scope of the project. Support in the preparation of project reports and publication of scientific results. • Support for the project's dissemination and knowledge transfer activities. • Support for ongoing R&D activities at the Renewable Energies Chair.

Scholarship 3	<p>The planned work for the scholarship is related to the activities of the NEXUS project in the field of developing low-cost repair or recycling methodologies for photovoltaic modules:</p> <ul style="list-style-type: none"> • Analysis of the legal and regulatory framework for photovoltaic systems. • Analysis of current methods for recycling and repairing photovoltaic systems. • Development of new processes and techniques to improve the efficiency of recycling and repair. • Evaluation of the environmental and economic impact of the newly developed techniques. • Creation of recommendations and policies for the effective implementation of recycling and repair processes. • Support in the design, implementation, commissioning, and testing of pilot structures for various use case trials. • Technical support for R&D tasks included in the project. • Analysis and production of technical documentation related to this area, to be developed within the scope of the project. Support in the preparation of project reports and publication of scientific results. • Support for the project's dissemination and knowledge transfer activities. • Support for ongoing R&D activities at the Renewable Energy Chair.
Scholarship 4	<p>The planned work for the scholarship is related to the activities of the NEXUS project with a focus on the modeling of electric mobility in ports:</p> <ul style="list-style-type: none"> • Analysis of the legal framework for electric mobility applications and vehicle (land and marine) charging integrated into port infrastructures. • Development of simulation models for the management of electric vehicles and charging. • Methodological optimization of the electric vehicle charging infrastructure in ports. • Evaluation of the environmental and economic impact of implementing electric mobility in ports. • Support in the design, implementation, commissioning, and testing of pilot structures for various use case trials. • Technical support for R&D tasks included in the project. • Support in the analysis of the technical-scientific results of these pilot projects, calculating key performance indicators and result metrics. • Analysis and production of technical documentation related to this area, to be developed within the scope of the project. Support in the preparation of project reports and publication of scientific results. • Support for the project's dissemination and knowledge transfer activities. • Support for ongoing R&D activities at the Renewable Energies Chair.

Applicable legislation and regulations: The granting of the Research Scholarship will be carried out upon the signing of a contract between the University of Évora and the scholarship holder, according to the version in **Annex I**, pursuant to the Research Scholarship Statute (Law No. 40/2004 of August 18 and Decree-Law No. 123/2019 of August 28) and in accordance with the legislation and Regulation of Research Grants of the Foundation for Science and Technology, IP in force, regulation nº950/2019 of December 16, 2019: <https://files.diariodarepublica.pt/2s/2019/12/241000000/0009100105.pdf> and other applicable rules.

Place of work: The work will be developed at the Renewables Energies Chair of the University of Évora, under the general coordination of the Administrator of the University of Évora and the scientific guidance of the Doctor Luis Fialho and Doctor José Silva, who must draw up an opinion on the final activity report of the scholarship (**Annex II**), according to the draft in **Annex III**.

Duration of the scholarship(s): The scholarship will have a duration of 12 months, starting on November of 2024. The scholarship contract may be renewed to up to the end of the financing of the NEXUS project budget allocation.

Amount of monthly maintenance allowance: The amount of the scholarship corresponds to €990,98, according to the table of scholarships awarded directly by FCT, I.P. in Portugal (https://www.fct.pt/wp-content/uploads/2024/02/Tabela-de-Valores-SMM_atualizacao-2024.pdf), payments being made monthly, by check or bank transfer.

Selection methods: The selection methods to be used will be the following:

Academic Qualifications: 50%

Classification: 50%

Adequacy: 50%

Curriculum Analysis: 50%

Scientific Activity: 50%

Experience in requested topics: 50%

Composition of the Selection Jury:

President – Dr. Luís Fialho (Principal Researcher - Renewable Energies Chair)

1st Member – Dr. Ana Foles (Researcher - Renewable Energies Chair)

2nd Member – Dr. José Silva (Auxiliary Researcher – Renewable Energies Chair)

1st Substitute – Dr. Afonso Cavaco (Auxiliary Researcher - Renewable Energies Chair)

2nd Substitute – Dr. Diogo Canavarro (Auxiliary Researcher - Renewable Energies Chair)

Advertising/notification of results: The final results of the evaluation will be publicized, through a list sorted by final grade posted in a visible and public place at the University of Évora (Renewable Energies Chair, Polo da Mitra), and the selected candidate will be notified by email. To ensure the right of prior hearing of interested parties, the Final Classification project will be announced by any written means to all interested parties.

After communicating the provisional list of the results of the evaluation, candidates have a

period of 10 working days to express their opinion in a preliminary hearing of interested parties. Based on the final ranking list, a reserve selection list will be drawn up, to be used for the possible recruitment of new scholarship holders within the scope of this project, up to the duration of the scholarship, which may be used in the eventuality of the first ranked candidate withdrawing, failing to present the mandatory documentation, or in the event of the scholarship holder canceling their scholarship early. In the eventuality that none of the candidates demonstrates the profile required to carry out the work plan, the jury reserves the right not to award the scholarship.

Application deadline and submission of applications: The tender is open from 02 of October to 23 of October of 2024 and the results of the selection will be published by 31 of October of 2024.

Applications must be formalized, obligatorily, by sending an application letter with the following documents: ***Curriculum Vitae, certificate of academic qualifications and other supporting documents considered relevant.***

For the purposes of application, the evidence may be replaced by a declaration of honor signed by the candidate, but the failure to demonstrate that evidence, in the contracting phase, possession of the required degree on the deadline for application or the non-presentation of proof of enrollment in the study cycle or non-degree course, for scholarships with this component, imply the cancellation of the candidate's application.

Academic degrees obtained in foreign countries require registration by a Portuguese Institution in accordance with Decree-Law no. 66/2018, of August 16 and Ordinance No. 33/2019, of January 25th.

The presentation of the certificate is mandatory for the signing of the contract. More information can be obtained at: <https://www.dges.gov.pt/pt/pagina/recognition?plid=374>

Applications must be sent by email to:

Doctor Luis Fialho

Renewable Energies Chair of the University of Évora

email: catedraer@uevora.pt

ANNEX I

MINUTE SCHOLARSHIP CONTRACT

Between,

FIRST PARTY: The _____ (name of organisation), com sede em _____ with registered office at _____ (address of registered office of organisation), with tax number _____, represented in this act by _____ (name of representative of organisation), in the capacity of _____ (Director/President) of the contracting/financing organisation, hereinafter referred to as the "First Party", and

SECOND PARTY: _____ (name of grantee), holder of ID card/passport no. _____ (ID card/passport no.) and taxpayer no. _____ (taxpayer no.), resident at _____ (address of grantee), hereinafter referred to as the "Second Party".

whereas,

The application requirements for the award of the scholarship under the call _____ (call identification / call notice reference) have been met, the process of evaluating the candidates and publicising the results has been completed and the required documentation has been received.

This scholarship contract is entered into in good faith and mutually accepted, under the terms of the Research Fellow Statute, and is governed by the following clauses:

FIRST CLAUSE

The First Party undertakes to award the Second Party a grant _____ (type of grant and reference of the call for tenders), within the scope of the project _____ (type of project) / R&D unit with the reference _____ (reference of the project or unit) and with the title _____ (title),

(Reference should be made to the sources of funding for the project/unit).

- with 100% OE funding - Mention of funding: financed by the Foundation for Science and Technology, I.P./MCTES through national funds (PIDDAC)
- With FEDER co-financing - Mention of funding:

Financed by the European Regional Development Fund (ERDF) of the European Union, through (indicate which Operational Programme it finances) Portugal 2030 or other programmes that may succeed it) starting at _____ (date of start of the scholarship), for a period of _____ months, possibly renewable (as defined in the call for proposals).

SECOND CLAUSE

In the alternative, the FCT Research Grant Regulations apply, of which the Second Party declares that it is aware.

THIRD CLAUSE

The Second Party undertakes to carry out the attached work plan, the content of which he/she declares that he/she has taken full cognisance of and accepts unreservedly, from the above-mentioned start date and on an exclusive dedication basis, under the terms of article 5th of the Research Fellow Statute.

FOURTH CLAUSE

The Second Party will carry out the work at _____ (*name of the host institution as defined in Article 3(g) of the FCT Research Grant Regulations*), which acts as the host institution, with _____ (*name of the supervisor and affiliation institution*) as the scientific supervisor.

FIFTH CLAUSE

1. The monthly maintenance allowance awarded is _____ (€...,00).
2. The Second Grantor also benefits from personal accident insurance for the duration of the grant, the conditions of which he/she declares to have read and accepted without reservation.
3. The following scholarship components are also added _____ (*specify the applicable components in the terms set out in the FCT Research Grant Regulations*).

SIXTH CLAUSE

The First Party may cancel the grant and the Second Party may be obliged to refund all or part of the sums received in the following cases:

- a) a) Serious and repeated failure to comply with the Second Party's obligations under the Research Grant Holder Statute and the FCT Research Grant Regulations, for reasons attributable to the Second Party;
- b) b) A negative evaluation of the Second Grantor's performance by the supervisor or the host organisation under the terms of the FCT Research Grant Regulations;
- c) c) False declarations by the Second Granting Party on matters relevant to the award and renewal of the grant or to the assessment of its development.

SEVENTH CLAUSE

Without prejudice to the provisions of the previous clause, this contract shall terminate automatically:

- a) Upon completion of the activity plan;
- b) End of the period for which the scholarship is awarded;
- c) Repeated non-compliance by one of the parties;
- d) Revocation by mutual agreement;
- e) Establishment of a legal employment relationship with the host organisation.

EIGHTH CLAUSE

1. The rights and duties of the parties are those resulting from the provisions of the Research Fellow Statute.
2. The Second Party declares that he/she has read the Research Fellow Statute and the applicable Regulation(s) and undertakes to comply with their provisions.

NINTH CLAUSE

It is agreed between the parties, that in case of need and to settle all questions arising from this contract, the District Court of _____ (*name of the District*) shall have jurisdiction, expressly waiving any other.

TENTH CLAUSE

Any changes to be made to the contract in the course of its performance shall be the subject of priorwritten agreement.

ELEVENTH CLAUSE

1. This contract shall take effect on the date it is signed by both parties.
2. The grant awarded under the terms of the FIRST CLAUSE of this contract may be renewed for additional periods of (...) months, up to a maximum of (...) months, under the terms of article 15 of the FCT Scholarship Regulations.
3. [ONLY FOR RESEARCH SCHOLARSHIPS, otherwise withdraw]: The award of the academic degree (or diploma) during the term of this contract shall not affect its effects, and the grant referred to in the preceding paragraph may be renewed at a later date, provided that it is aimed at carrying out activities that are indispensable for the completion of the project (...).
4. The concrete definition of the activities referred to in the previous paragraph is the responsibility of the First Party, after hearing the Second Party and the Scientific Advisor, and they must be included in the agreement to be signed, as provided for in the previous clause.

_____, _____ of _____

The First Party

The Second Party

ANNEX III

**MODEL OF THE FINAL EVALUATION REPORT ON THE ACTIVITY OF THE
SCIENTIFICRESEARCH FELLOW TO BE DRAWN UP BY THE SCIENTIFIC
SUPERVISOR**

1. Scientific supervisor of the scholarship:
2. Identification of the grant:
3. Project name:
4. Host organisation:
5. Fellow:

5.1. Critical analysis of the activities and work carried out by the grant holder.

[A brief description of the activities carried out by the grant holder, in accordance with the announcement and the activity plan, and a critical appraisal of the objectives and results achieved by the grant holder].

5.2. Final assessment of the work carried out by the grant holder.

[Reasoned overall appraisal of the work carried out by the grant holder, with a final positive or negative balance, addressing their performance, effort and dedication]

Évora, _____ of _____ 20__

The Scientific Supervisor of the Scholarship, _____ (full name)
